

## An automated and secure backup system to protect your data

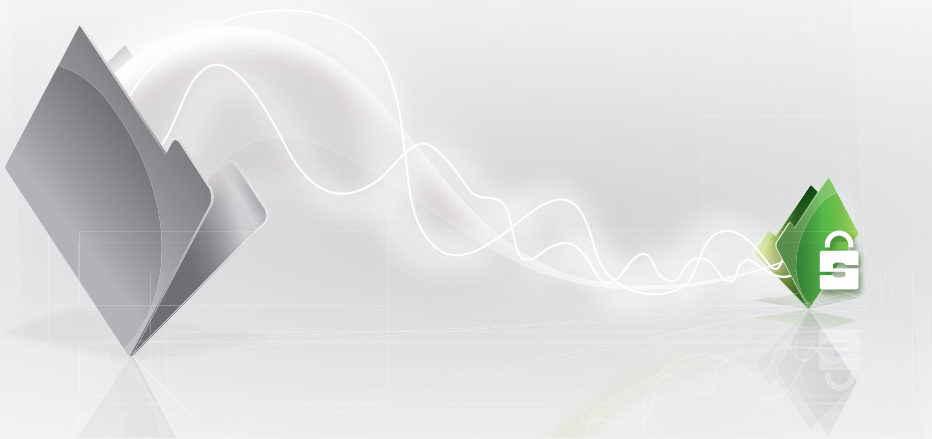

Stop worrying about incomplete or forgotten backups, stolen backup disks or tapes, or about your damaged or destroyed hard drive following a disaster.

Perform a complete and automated backup per day and make sure you have quick access to the most recent data in the event of server failure, theft or disaster.

Avoid the high costs associated with the loss of your invoices, purchase orders and accounts receivable.

Choose safety, simplicity and savings of time and money!

Secured Online Backup, a reliable and affordable turnkey backup solution

*Together to optimize your performance*

# Stop worrying about your backups!

## One service, two practical applications:

- Ensure complete, worry-free protection of your data with a fully automated online backup system
